

P2PB2B Getting Started Guide

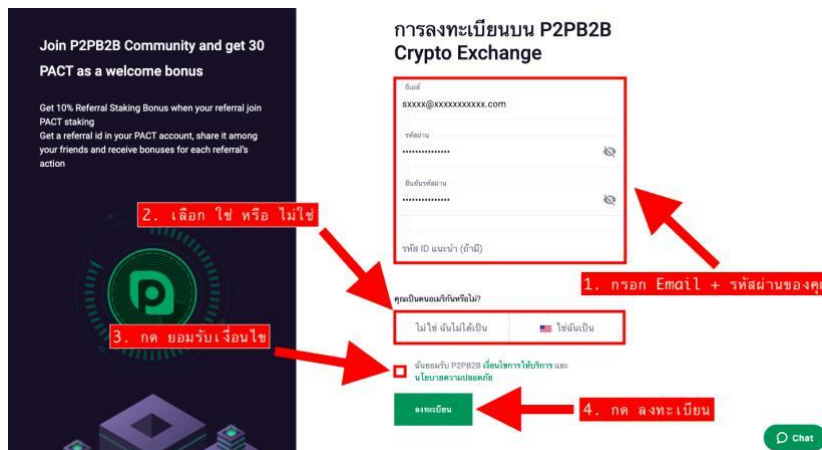

You can register and trade via the website only (as P2PB2B does not yet have a mobile application).

Registration Steps

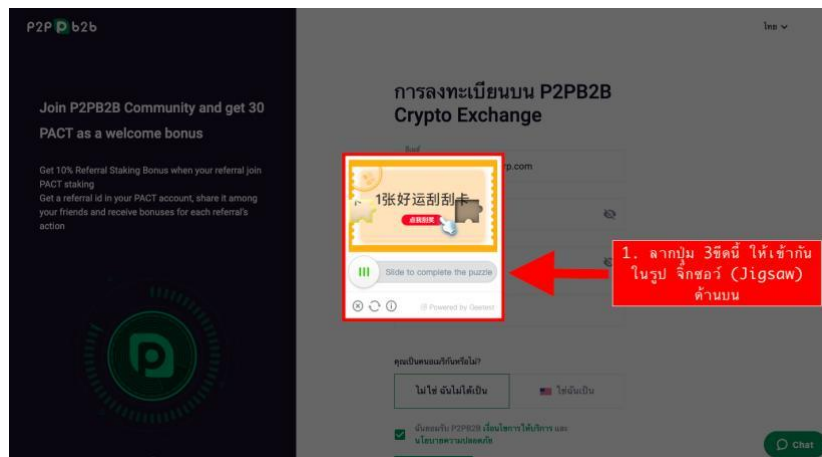

1. Click the link → <https://p2pb2b.io/th/>
- Click → Change language to TH/EN
- Click → Register

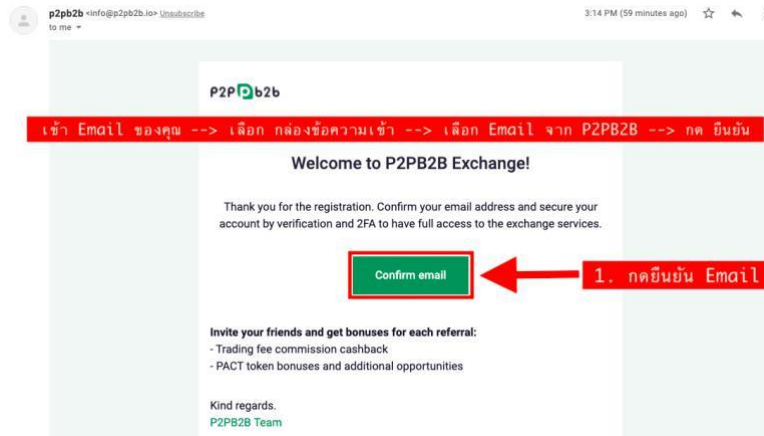

2. Enter your email.

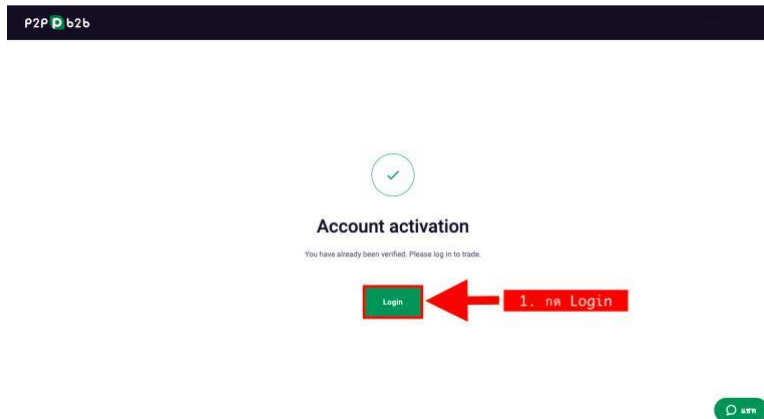

3. Click "Register" → A puzzle verification will appear → A message will pop up saying "Thank you for registering" → Click "OK".

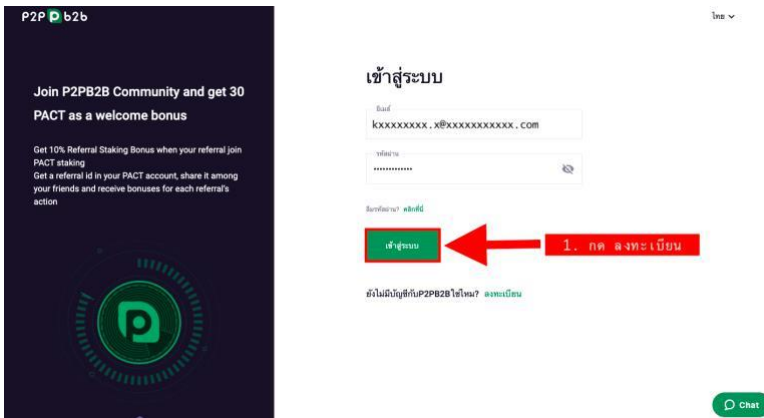

4. Confirm your registration via the email you provided.

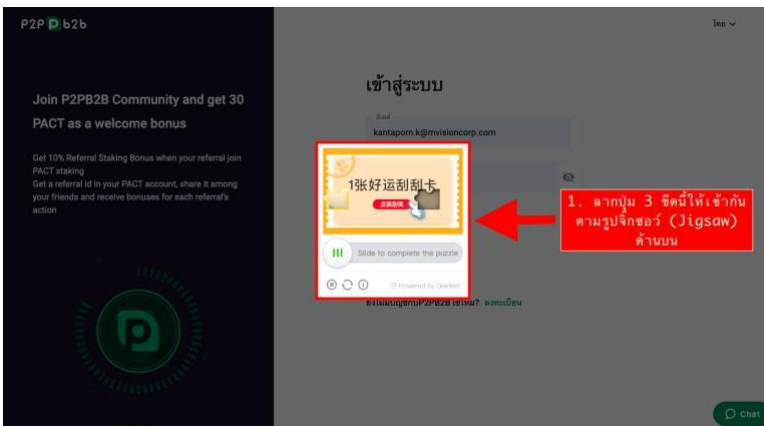

5. Click "Login"

You will be redirected to the login window. Enter your email and password → Click "Login".

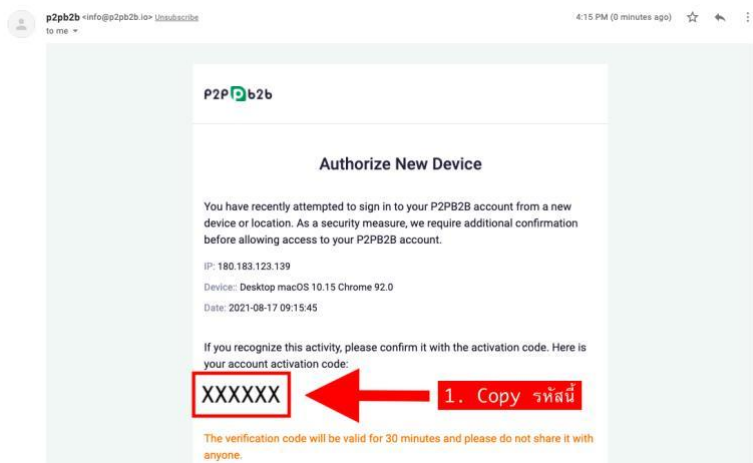

6. A puzzle verification will appear for login confirmation.

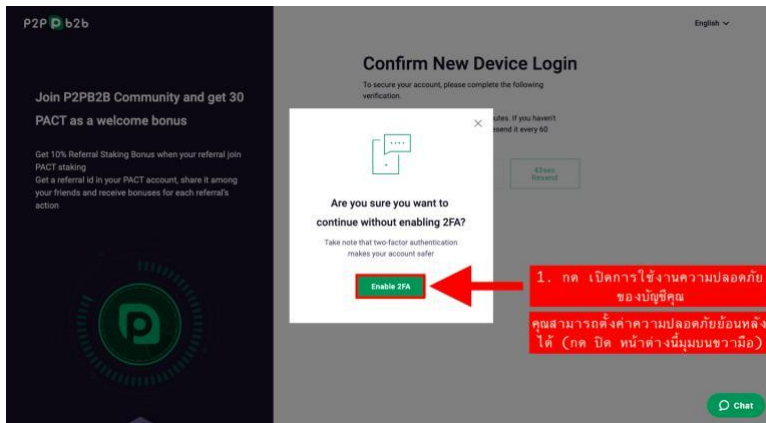

7. Confirm your login → Enter the code sent to your email.

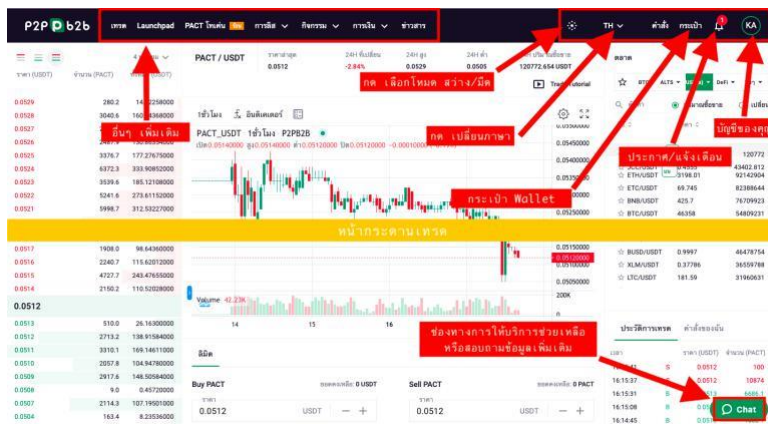

Copy the 6-digit code from the latest P2PB2B email and paste it into the required field.

8. Enable 2FA security for your account (this can be set up later, but it is required for all transactions).

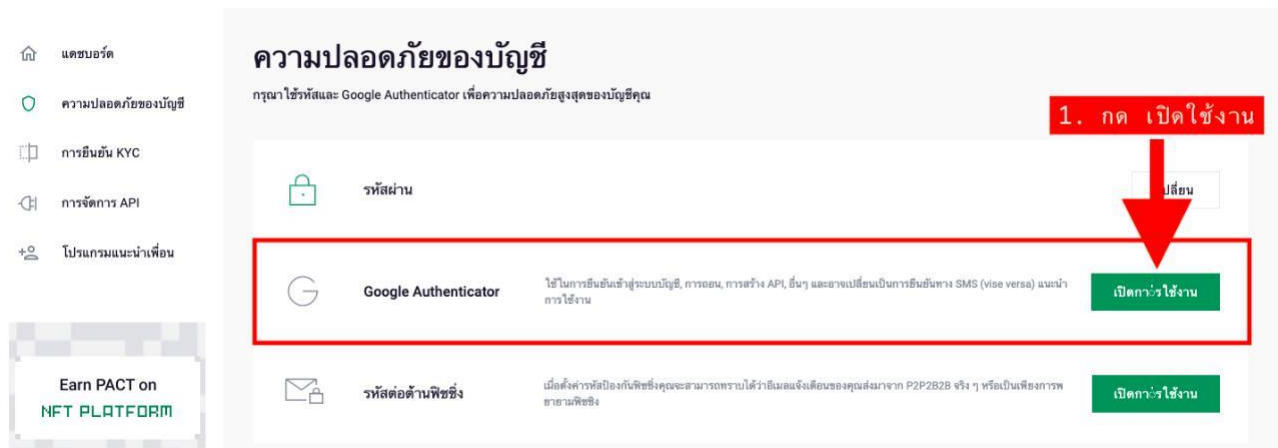

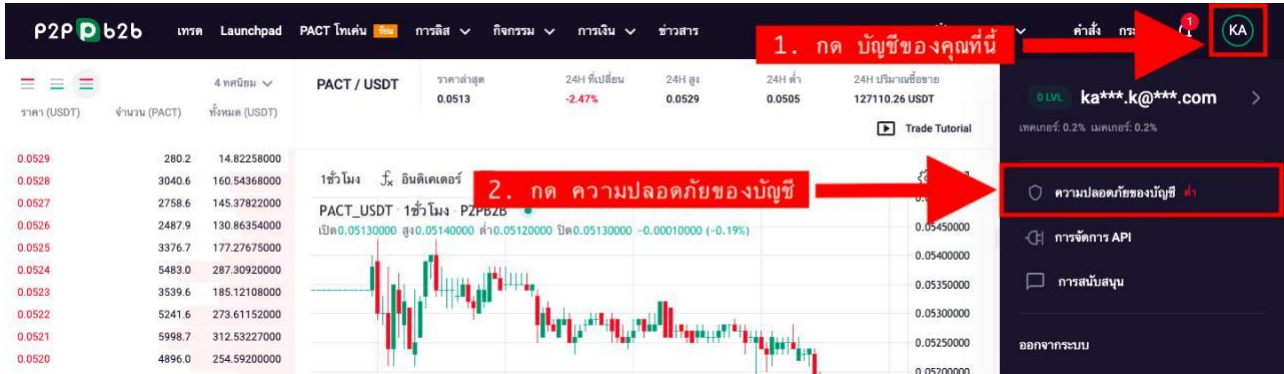

9. Registration is complete → Access the trading dashboard.

Setting Up Account Security

1. Enabling Google Authenticator (2FA)

Steps to enable Google Authenticator (2FA):

- If you have not yet installed Google Authenticator, follow these steps
 - Download the appropriate version based on your mobile operating system
 1. iOS: Download from the App Store
 2. Android: Download from Google Play.
 - Click "Next" to proceed.
- If you already have Google Authenticator installed, click "Next".

เปิดใช้งาน Google Authenticator

Final steps:

- 1. Enable Google Authenticator.
- 2. Enter your password to activate Google Authenticator.
- 3. Enter the Google Authenticator code from your app.
- 4. Click "Next".

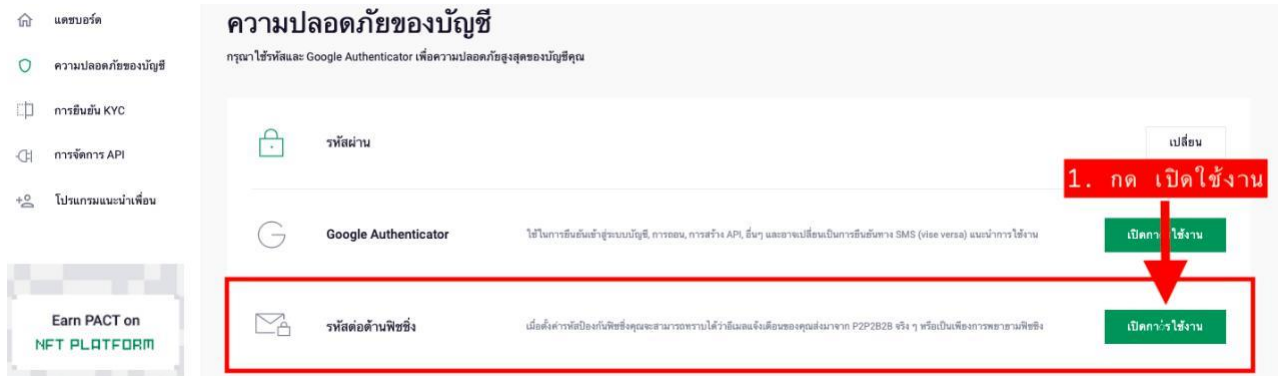

เปิดใช้งาน Google Authenticator

Setup is complete → Click "Back" (top left corner).

Enabling Anti-Phishing Code (Optional)

- You can skip this step if you do not want to enable it.
- To enable anti-phishing code
 1. Click "Enable".

2. Click "Create" (read the details about what an anti-phishing code is).

รหัสต่อต้านฟิชซิง

⚠️ อย่าเปิดเผยรหัสผ่านรหัสตรวจสอบสิทธิ์ Google หรือ SMS ของคุณกับใครก็ตามรวมถึงการสนับสนุน P2PB2B

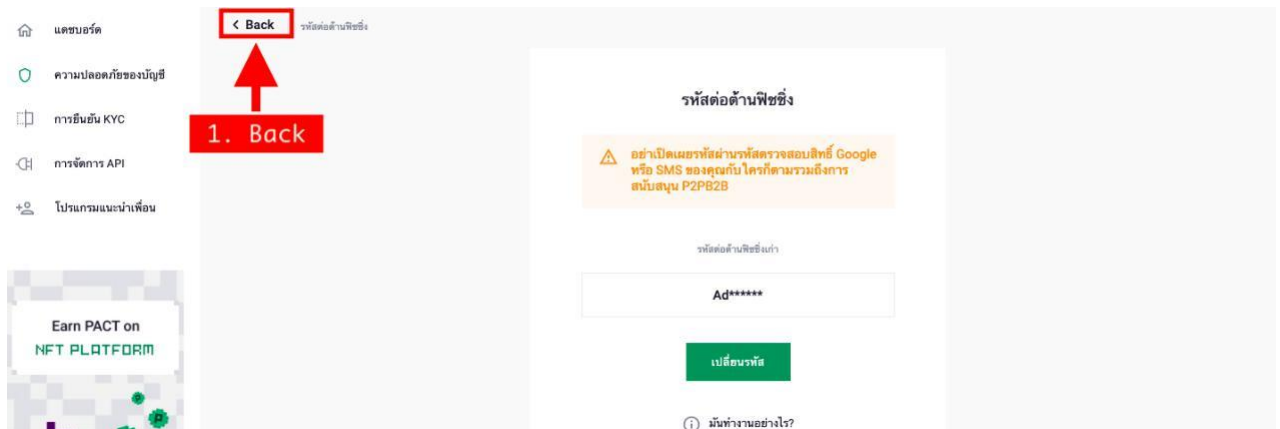

รหัสต่อต้านฟิชซิงคืออะไร?
Anti-Phishing Code คือรหัสที่ช่วยป้องกันการพยายามฟิชซิงจากเว็บไซต์ P2PB2B ปลอมหรือที่อยู่อีเมล

มันทำงานอย่างไร?
เมื่อคุณตั้งรหัสป้องกันฟิชซิงเฉพาะของคุณแล้วรหัสดังกล่าวจะรวมอยู่ในอีเมล P2PB2B ของทั้งหมด

รายละเอียดรหัสต่อต้านฟิชซิง คืออะไร?

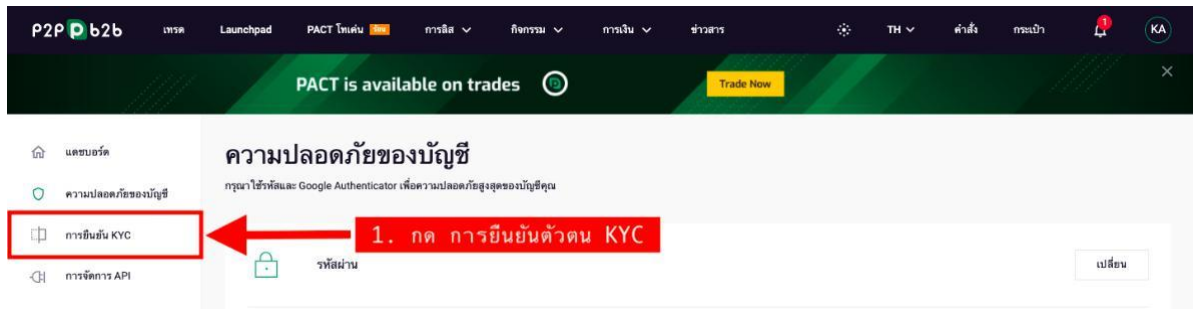

3. Setup is complete → Click "Back" (top left corner).

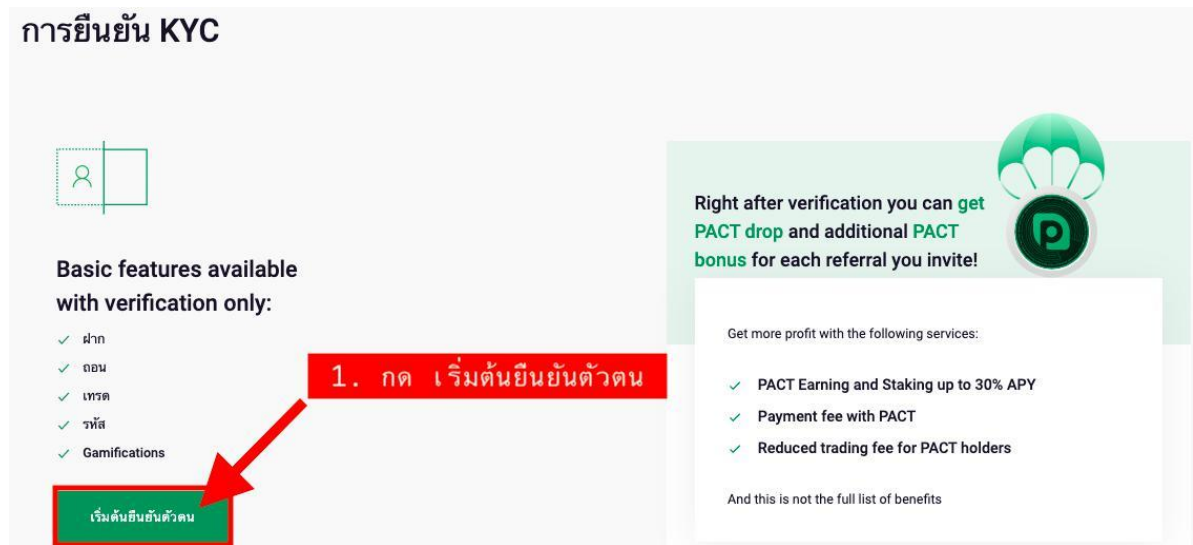

Identity Verification (KYC)

1. Click "Identity Verification (KYC)".

2. Click "Start Verification".

3. Fill in your personal details completely and accurately.

4. After completing registration, wait for verification results via email.
 - > If your verification is successful, you will be notified immediately.
 - > If verification fails, P2PB2B will send you an email to update your personal details.
 - > Once verification is complete, you can deposit, withdraw, buy, and sell coins on P2PB2B immediately.

*** Note: Always check your email inbox and spam folder for updates.**
